Event Agenda

49th Annual Conference of the Research Council on Mathematics Learning (RCML)

Thursday, March 03, 2022

Registration

3:30 PM - 8:30 PM | Location: Meritage Lobby

Poster Sessions

4:00 PM - 5:00 PM | Location: International I

The RCML professional poster session will include the work of numerous researchers. This session will take place in one large room. Participants are encourage to walk by each poster and participant in scholarly discourse related to the research presented on each poster. You should set aside about ten or fifteen minutes per poster to review all of the participants work.

Pre-service Teachers' and Mathematics Disciplinary Literacy

4:00 PM - 5:00 PM

Authors: Ananthi Sankaranarayanan

Disciplinary literacy-based instruction empowers students to engage in deeper content learning and it is crucial that teachers exercise this strategy

Leveraging Coaches to Close Middle School Math Teachers, The Knowing-Doing Gap

4:00 PM - 5:00 PM

Authors: Jennifer Gonzales

Explore how mathematics instructional coaches can help address the complicated relationship between mathematics teachers, knowledge, beliefs, and implementation of NCTM, Mathematics Teaching Practices.

Problem-Solving Strategies Used by Students with Learning Disabilities

4:00 PM - 5:00 PM

Authors: Emily Evans; Jonathan Bostic

The purpose of this poster is to explore diversity in students, problem solving, focusing intently on students identified with learning disabilities.

Speakers

Emily Evans

Bowling Green State University

Jonathan Bostic

Professor of Mathematics Education | Bowling Green State University

Investigating Urban HS Students' Math Attitudes Using Equitable Practices

4:00 PM - 5:00 PM

Authors: Brian Dossey

Join us as we examine a quantitative study demonstrating that using the mathematics workshop approach with urban high school students creates a more equitable environment to learn and improves attitudes towards mathematics at the same time measured by the Attitudes Towards Mathematics Inventory (Lim & Chapman, 2013).

Speaker

Brian Dossey

Doctoral Student | Baylor University

Understanding Epistemological Frames of Statistics Students in Psychology

4:00 PM - 5:00 PM

Authors: Carlos Vargas

Psychology students often dread statistics courses, frequently due to misconceptions regarding its purpose, therefore, this study explores perspectives of knowledge (epistemological frames) that students generate.

Evaluating the Mathematical Self-Efficacy of Children during Assessments Drafts

4:00 PM – 5:00 PM

Authors: Nicholas Drown; Gabriel Matney; Jonathan Bostic

This presentation will explore the differences and similarities of students' efficacy when taking an assessment of problem-solving items and when taking a traditional unit test.

Speakers

Nick Drown

Graduate Assistant | Bowling Green State University

Gabriel Matney

Professor | Bowling Green State University

Jonathan Bostic

Professor of Mathematics Education | Bowling Green State University

Examining Diversity in Problem-Solving Strategies between Experts & Pupils

4:00 PM - 5:00 PM

Authors: Abigail Martin

This presentation shares research involving students' problem-solving solutions, via their chosen procedures and representations and compares them to predicted responses from content experts.

Can Student Connect Slope to Context?

4:00 PM - 5:00 PM

Authors: Christine Painter

Lesson study is used to understand if students can determine the meaning of slope in linear equations based on responses to an in-class activity.

Speaker

Christine Painter

BGSU

Understanding Teachers' Knowledge: from PCK to MTSK

4:00 PM - 5:00 PM

Authors: Julio Solis

There is a gap in understanding pedagogical knowledge in higher education. This review explores the MTSK framework allowing the researcher to analyze professors' knowledge.

Wilson Lecture: My Life with Numbers: The Good, the Bad, and the Ugly

5:30 PM - 6:30 PM | Location: International II-III

Dr. Tilton will present on her experiences with mathematics, statistics, and math educators over her lifetime (she will be brief!) She will highlight how overcoming her fear of mathematics (statistics in particular) with the help of dedicated and caring math educators led her to where she is today.

Speaker

Abigail Tilton

Dean of the College of Arts and Sciences | Texas Woman's University

Welcome Reception

6:30 PM - 8:30 PM | Location: Bonnie & Clyde's Pavilion (combined w/ Meritage)

Reception

Friday, March 04, 2022

Co-Teaching in Middle School Mathematics

8:00 AM - 8:55 AM | Location: Cross Timbers I

Authors: Rachel Bower

In fall 2021 two mathematics teachers co-taught in a sixth-grade mathematics classroom. Their purpose was to document the experience and begin an investigation into what makes such a relationship possible and potential benefits to students. Considerations for the future of this research will be discussed.

Rachel Bower

Assistant Professor of Mathematics Education | Nevada State College

What We Continue to Learn

8:00 AM - 8:55 AM | Location: Haak

Authors: Ryan Fox; Huntir Bass

We continue our previous work to develop and refine content and pedagogical knowledge useful for teaching university-level precalculus math classes.

Speakers

Ryan Fox

Associate Professor of Mathematics Education | Belmont University

Huntir Bass

Mathematics Teacher | Bishop Moore Catholic High School

Guides for Math Vocabulary: Examining the Trajectory for Elementary PSTs

8:00 AM - 8:55 AM | Location: Becker I

Authors: Amy Ray; Julie Herron; Emma Bullock; Beth Cory; Mary Swarthout

This presentation focuses on the trajectory of vocabulary for PSTs from an undergraduate mathematics course to the assessments their students will take.

Speakers

Amy Ray

Assistant Professor | Sam Houston State University

Julie Herron Augusta University

Associate Professor | Sam Houston State University

Beth Cory

Emma Bullock

Associate Professor | Sam Houston State University

Mary B. Swarthout

Associate Professor Of Mathematics Education | Sam Houston State University

Assessment standard setting: What, How, and Why?

8:00 AM - 8:55 AM | Location: Becker II

This presentation describes a standard setting process used with a validated problem-solving series. Attendees will learn a replicable, efficient process for setting standards for evidence-based assessments.

Speakers

Jonathan Bostic

Gabriel Matney

Tim Folger

Karen Zwanch

Professor of Mathematics Education | Bowling Green State University

Professor | Bowling Green State University

Bowling Green State University

I Notice, I Wonder: Mathematizing among Alternatively Certified Teachers

8:00 AM - 8:25 AM | Location: Cross Timbers II

Authors: Karen Zwanch

This study examined novice teachers, responses to creating an "I Notice, I Wonder Digital Journal" to support their pedagogy and mathematics thinking.

Speaker

Assistant Professor of Mathematics Education | Oklahoma State University

Using Zines in a Mathematics Classroom to Promote PST Understanding

8:30 AM - 8:55 AM | Location: Cross Timbers II

Authors: Ann Wheeler; Winifred Mallam

During this presentation, the researchers will discuss the use of zines to promote learning in mathematics education classes for preservice teachers. Examples of electronic and paper zines will be explored.

Speakers

Ann Wheeler

Professor | Texas Woman's University

Winifred Mallam Txas Woman's University

Don't Touch My Hair-Using Culture to Teach Mathematics

9:00 AM – 9:25 AM | Location: Homestead

Authors: Jessica Showell

This research focuses on using ethnomathematics to connect the cultural staple of Black hairstyles to teaching and learning of mathematics.

Speaker

Jessica Showell

PhD Student | Georgia State University

Secondary Math Teachers: Will and Skill for Student Engagement

9:00 AM - 9:25 AM | Location: Becker I

Authors: Kimberley Odonnell

Studying the connection between personal responsibility and self-efficacy for student engagement outcomes.

Speaker

Kimberley Odonnell

Baylor University

Utilization of bilingual languaging practices in family mathematics events

9:00 AM – 9:25 AM | Location: Haak

Authors: Gerardo Sanchez Gutierrez

We explore how bilingual families make sense of mathematical problems using their entire linguistic repertoire while completing a mathematics task.

Speaker

Gerardo Sanchez

Doctoral Candidate in STEM Education | University of Texas at Austin

Framework for and Development of the Metacognition for Teaching Inventory

9:00 AM - 9:25 AM | Location: Cross Timbers II

Authors: John Weaver; Juliana Utley

In this presentation, we will discuss a theoretical framework for metacognition for teaching and describe the development of the Metacognition for Teaching Inventory (MTI).

Speakers

Clinical Instructor | Oklahoma State University

Juliana Utley

Professor and Morsani Chair in Mathematics/Science Education | Oklahoma State University

From Gatekeeper to Gateway

9:00 AM - 9:25 AM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

Authors: Taajah Witherspoon

Algebra is considered as a gatekeeper for higher mathematics. This research sought to expand on the direct correlation that exists between multiplicative and fractional reasoning with algebraic competence.

Taajah Witherspoon

Assistant Professor (2015) | The University of Alabama at Birmingham

Networking and Collaboration Break

9:30 AM - 9:55 AM

Break Time! This year we would like to provide an opportuntiy for networking and fellowship. So, from 9:30 and 9:55 am, we encourage you to meet someone new, catch up with old friends, or just take a moment to enjoy the company of others scholar over a cup of coffee.

PIVOT!: Preparing Pre-Service Teachers for Interruptions in Schooling

10:00 AM - 10:55 AM | Location: Homestead

Authors: Brianna Kurtz

This presentation will explore a project preparing pre-service K-12 teachers in their ability to ,Äúpivot,Äù in their delivery methods in mathematics

Speaker

Brianna Kurtz

Assistant Professor of Teacher Education | Mary Baldwin University

OU Transformative Tutoring Initiative: A High-Dosage Math Tutoring Model

10:00 AM - 10:55 AM | Location: Cross Timbers I

Authors: Stacy Reeder; Kate Raymond; Mandy Howell; Cristina Moershel; Jennifer Johnson

High-dosage tutoring models have been shown to significantly improve learning. The features of our tutoring program with two local high schools will be shared.

Speakers

Stacy Reeder University of Oklahoma

Kate Raymond

Assistant Professor | University of Oklahoma

Mandy Howell

Doctoral Candidate | University of Oklahoma

Cristina moershel

The University of Oklahoma

Active Learning Ingresses of Early-Career Collegiate Instructors

10:00 AM - 10:55 AM | Location: Haak

Authors: Sean Yee; Kimberly Rogers

Sean Yee

This study identifies the active-learning methods that novice mathematics graduate student instructors found most accessible, helping with novice professional development.

Speaker

Associate Professor | University of South Carolina

Using Children's Literature: PSTs Write Rigorous Lessons, or Do They?

10:00 AM - 10:55 AM | Location: Becker I

Authors: Winifred Mallam; Georgia Cobbs; Ann Wheeler

This session focuses on mathematics lessons pre-service teachers (PSTs) created using children, Äôs literature. Participants will evaluate and critique sample lessons.

Speakers

Winifred Mallam

Txas Woman's University Georgia Cobbs

Ann Wheeler Professor | Texas Woman's University

Assessing Undergraduate Students' Multiplicative Concepts

10:00 AM - 10:55 AM | Location: Becker II

Authors: Jianna Davenport

Discussion of the validation of an assessment for undergraduate students, Äô multiplicative concept stage and it, Äôs use in undergraduate student mathematics thinking and reasoning research.

Speaker

Jianna Davenport

Graduate Assistant | Oklahoma State University

Personal Inventory in College Algebra

10:00 AM - 10:25 AM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

Students that monitor their own learning progression, and adopt new strategies to improve learning, possess a positive self-regulatory trait that often leads to academic success.

Speaker

Karl Kruczek

Elementary PSTs' Mathematics Teaching Beliefs after Teaching STEM Virtually

10:30 AM - 10:55 AM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

This session explores elementary PSTs beliefs about mathematics teaching after a virtual STEM teaching experience.

Speakers

Professor | Auburn University

Megan Burton

Cathrine Maiorca University of California- Long Beach

Middle school mathematics teachers' curriculum work during the pandemic

11:00 AM - 11:55 AM | Location: Homestead

Authors: Hilary Tanck

Findings from a post-qualitative study investigating four middle school mathematics teachers, Äô curriculum work during the COVID-19 pandemic will be presented.

Speaker

Hilary Tanck

Professional Practice Assistant Professor | Utah State University

Understanding Collaborative Math Partnerships: Learning From Research

11:00 AM - 11:55 AM | Location: Cross Timbers I

Authors: Trena Wilkerson; Colleen Eddy; Tina Mitchell; Megan Che; Jamaal Young

Join the conversation about the importance of collaborative partnerships in mathematics education and what is available in current research on systematic partnership processes

Speakers

Colleen Eddy

Associate Professor of Mathematics Education | University of North Texas

Assistant Professor, Coordinator pf MAT Program | Delaware State University

Megan Che

Tina Mitchell

Associate Professor | Clemson University

Jamaal Young

Associate Professor of Mathematics Education | Texas A&M University

A Framework for Equity Centered Co-Design

11:00 AM - 11:55 AM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

Authors: Aris Winger; Allison DePiro; Sam Rhodes; Sheela Sethuraman

A Framework for Equity Centered Co-Design

Speakers

Allison DePiro

Senior Implementation Specialist | CueThink

Sam Rhodes

Assistant Professor | Georgia Southern University

Aris Winger

Supporting Preservice Teachers' Learning of Word Problems with Linguistics

11:00 AM - 11:55 AM | Location: Becker I

Authors: Ashley Williams; Rachael Welder; Michelle Kwok; Jason Moore

Linguistic analysis was applied to support preservice K-8 teachers in making sense of semantic and structural differences in additive word problems.

Speakers

Graduate Instructor | Texas A&M University

Rachael Welder

Texas A&M University

Clinical Assistant Professor | Texas A&M University Jason Moore

Michelle Kwok

Assistant professor | Oakland University

Systemic Coherence Through a Shared Vision of Mathematics Instruction

11:00 AM - 11:55 AM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

Authors: Holt Wilson; Christine Fisher; Cathy Holl-Cross; Olanrewaju Oriowo

We present an initial framework and methodology for supporting the implementation of state K-12 mathematics standards that centralizes a shared instructional vision.

Speakers

Holt Wilson

University of North Caroliona Greensboro

Christine Fisher

University of North Caroliona Greensboro

Cathy Holl-Cross

Graduate research assistant | University of North Carolina Charlotte

Olanrewaju Oriowo

University of North Caroliona Charlotte

Experiences of Urban Mathematics Teachers' during the COVID-19 Pandemic

11:00 AM - 11:25 AM | Location: Cross Timbers II

Authors: Mary Capraro; Robert Capraro; Alesia Moldavan

During this presentation we will discuss 10 urban secondary mathematics teachers, Äô experiences regarding their transition to remote instruction. Recommendations regarding remote instruction will be provided

Speakers

Mary Margaret Capraro

Professor: Mathematics Education | Texas A&M University

Robert Capraro Professor | Texas A&M University

Alesia Moldavan

Assistant Professor | Georgia Southern University

The Impact of Remote Learning on Undergraduates' Math Anxiety

11:25 AM - 11:55 AM | Location: Cross Timbers II

Authors: Melinda Lanius

We study the effect of the Spring 2020 emergency remote transition on undergraduate student's math anxiety.

Speaker

Melinda Lanius Auburn University

RCML Business Meeting w/ Lunch

12:00 PM - 1:25 PM | Location: International IV

Teaching & Learning Mathematics Within Integrated STEM

1:30 PM – 1:55 PM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

This session shares research featured in Investigations in Mathematics Learning, Äôs special issue on teaching and learning mathematics within integrated STEM.

Speakers

Christa Jackson

Professor, Mathematics, Science, and STEM Education | Saint Louis University

Thomas Roberts

Assistant Professor | Bowling Green State University

Cathrine Maiorca

University of California- Long Beach

Validating the Algebra Teacher Self-Efficacy Instrument for PSTs

1:30 PM - 1:55 PM | Location: Haak

Authors: Melissa Donham; Dittika Gupta; Trena Wilkerson; Colleen Eddy

This presentation will share the validation of the Algebra Teacher Self-Efficacy Instrument (ATSEI) for pre-service teachers (PSTs), initial findings, and implications in teacher education.

Speakers

Melissa Donham

Baylor University

Dittika Gupta

Associate Professor | Midwestern State University

Trena Wilkerson

Professor | Baylor University

Colleen Eddy

Associate Professor of Mathematics Education | University of North Texas

Rooting Interdisciplinary Collaboration in Social Justice

1:30 PM – 1:55 PM | Location: Becker II

Authors: Summer Bateiha; Sadia Mir

Although teaching mathematics in conjunction with multiple disciplines exists and is explored in mathematics education research, we focus on social justice connecting mathematics and storytelling.

Speaker

Dr. Summer Bateiha

Professor | Virginia Commonwealth University in Qatar

Middle Grade Students' Mathematics Identity: Instrument Development

1:30 PM – 1:55 PM | Location: Cross Timbers II

Authors: Jennifer Cribbs; Juliana Utley; John Weaver

In this presentation, we will discuss the development of a mathematics identity instrument that can be used with middle grades students.

Jennifer Cribbs

enniner onbb3

Associate Professor | Oklahoma State University

Juliana Utlev

Professor and Morsani Chair in Mathematics/Science Education | Oklahoma State University

John Weaver

Clinical Instructor | Oklahoma State University

Hip-hop Supergroup Lessons in Pedagogy: A Collaborative Autoethnography

1:30 PM – 1:55 PM | Location: Becker I

Authors: Marti Cason; Melanie Fields

A collaborative autoethnography with two mathematics educators examining the experience of a hip-hop supergroup as a form of pedagogical development.

Speaker

Marti Cason

Mathematics Teacher | Vanguard High School - Mesquite ISD

Mathematics Learning Loss due to Interruptions in Formal Education

2:00 PM - 2:55 PM | Location: Homestead

Authors: Davie Store; Jessie Store

This study will focus on exploring if there are differences in student performance in all mathematics domains during the COVID-19 pandemic.

Speakers

Davie Store

Central Michigan University

Jessie Store

Alma College

Advancing the Productive Struggle: A Scoping Review

2:00 PM – 2:25 PM | Location: Cross Timbers II

Authors: Miriam Sanders; Danielle Bevan; Mary Capraro; Robert Capraro; Jamaal Young

This proposed session presents the results of a scoping review that helps to increase the nexus between the theoretical and practical application of productive struggle.

Speakers

Miriam Sanders

Graduate Assistant | Texas A&M University

Danielle Bevan

Mary Margaret Capraro

Professor: Mathematics Education | Texas A&M University

Robert Capraro

Professor | Texas A&M University

Jamaal Young

Associate Professor of Mathematics Education | Texas A&M University

Don't Criticize, Create: Blank-Slate Learning

2:00 PM - 2:55 PM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

Authors: Barba Patton; Sara Thurmond; Andy Tomek; Angela Winn

Acclimating to new environments can be hard, especially today. Starting fresh with a ,blank slate, is the best way to ensure the success of students

Speakers

Angela Winn

Math tutor and supplement instructor | University of Houston-Victoria

Andy Tomek

University of Houston-Victoria

Problem Posing: Understanding Prospective K-8 Teachers' Common Errors

2:00 PM - 2:55 PM | Location: Becker I

Authors: Ashley Williams; Rachael Welder

Developing PTs problem posing skills by identifying trends and error patterns in the multi-step word problems they pose.

Speakers

Ashley Williams

Graduate Instructor | Texas A&M University

Rachael Welder Texas A&M University

Towards Paradise as a Framework for Mathematics Education

2:00 PM - 2:55 PM | Location: Cross Timbers I

Authors: Nickolaus Ortiz

I use two stories about Black life to theorize a Black Liberatory Mathematics Education (BLiME). This framework seeks to resist anti-Blackness in mathematics education.

Nickolaus Ortiz

Assistant Professor | Georgia State University

Investigations in Mathematics Learning (IML) Editor Chat 1

2:00 PM - 2:55 PM | Location: Pheasant Ridge

Come chat with an editor for RCML's flagship journal: Investigations in Mathematics Learning (IML)! Bring ideas and questions for your 1-1 meeting! No advance notice is needed.

Speaker

Jennifer Cribbs

Associate Professor | Oklahoma State University

Meta-analyses on Few Studies: Techniques, Benefits, Drawbacks, and Examples

2:25 PM - 2:55 PM | Location: Cross Timbers II

Authors: Michael Rugh; Jamaal Young; Mary Capraro; Robert Capraro

Meta-analysis allows us to better examine the effect of a treatment even after a few studies. Methods, benefits, drawbacks, and an example are provided.

Michael Rugh

Jamaal Young

Adjunct Professor | Texas A&M University

Associate Professor of Mathematics Education | Texas A&M University

Mary Margaret Capraro

Professor: Mathematics Education | Texas A&M University

Robert Capraro

Professor | Texas A&M University

How do Teacher Preparation Programs Prepare Teachers to Choose Curriculum?

3:00 PM - 3:25 PM | Location: Cross Timbers II

Authors: Kate Raymond

This session will investigate how teacher preparation program are preparing teacher to integrate online curriculum materials into their practices.

Speaker

Kate Raymond

Assistant Professor | University of Oklahoma

Examining Validity Evidence: Promoting Valid Interpretations and Uses

3:00 PM – 3:25 PM | Location: Homestead

Authors: Timothy Folger; Jonathan Bostic; Erin Krupa

Bowling Green State University

This submission presents components of a research study using the Delphi method with experts in the field of validity and validation.

Speakers

Jonathan Bostic

Tim Folger

Professor of Mathematics Education | Bowling Green State University

Examining Lesson Study in Preservice Teacher Education

3:00 PM - 3:25 PM | Location: Cross Timbers I

Authors: Gabriel Matney

This study of preservice teachers investigates their experiences with a program requirement to learn about and engage in multiple iterations of open approach lesson study.

Speaker

Gabriel Matney

Professor | Bowling Green State University

The Impact of State Promotion Policies

3:00 PM - 3:25 PM | Location: Haak

Authors: Claudine Keane

The present multiple case study explored three New York City mathematics teachers, Åô experiences and perspectives with social promotion and academic promotion criteria. This study described and highlighted how the NYC promotion criteria policies impact their teaching and decision-making.

Speaker

Claudine Keane

Baylor University

Pathway Based Instruction

3:00 PM - 3:25 PM | Location: Becker I

Authors: Jacqueline Dass

Targeting instruction for every learner based on their individual levels of needs for each and every learning standard.

Speaker

Jacqueline Dass

Owner/CEO | www.mymathpath.com

History of Mathematics in the Classroom: A Focus on Cultures

3:00 PM - 3:25 PM | Location: Virtual

Authors: Brian Evans

A brief overview in math history through various cultural contributions is given, and generates ideas for using math history to motivate students.

Speaker

Networking and Collaboration Break

3:30 PM - 3:55 PM | Location: Delaney Hallway

Teaching Mathematics Online: A Citation and Keyword Co-occurance Analysis

4:00 PM - 4:25 PM | Location: Cross Timbers II

Authors: Jamaal Young

This study examines the citation patterns and keyword co-occurance trends present amongst studies examine the teaching of calculus online. The results of this study provide bibliometric data that can inform research and practice related to the teaching and learning of calculus online.

Speaker

Jamaal Young

Associate Professor of Mathematics Education | Texas A&M University

Mathematics Problem Solving, Literacy, and ELL for New Teachers

4:00 PM – 4:55 PM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

Authors: Brian Evans

We will discuss supporting new math teachers as they teach ELL students, particularly in the context of urban environments.

Speaker

Brian Evans Professor | Pace University

41 Years of Teaching: Have Things Really Changed?

4:00 PM - 4:55 PM | Location: Cross Timbers I

Authors: Daniel Brahier

A reflection on mathematics education as it has changed (and stayed the same) from 41 years, Aô experience of classroom teaching.

Daniel Brahier

Professor | Bowling Green State University

Learning to Notice: PSTs Noticing During a Varied Field Experience

4:00 PM - 4:55 PM | Location: Becker I

Authors: Sandi Cooper; Michael Warren; Kenley Ritter; Melissa Donham; Melissa Donham

This session reports on a study analyzing the development of preservice teacher noticing during a summer mathematics academy for early learners.

Speakers

Sandi Cooper

Professor and Associate Dean of Undergraduate Education | Baylor University

Michael Warren

Instructor of Mathematics | Tarleton State University

Kenley Ritter Baylor University

Melissa Donham Baylor University

Founders Lecture: Current Research Trends in Mathematics Learning That Guide Us for the Future

5:00 PM - 6:00 PM | Location: Delaney

Let's examine research trends in mathematics learning by reflecting on the past five years. This lens will help us to consider how we can plan for the future. What has been the impact? Where do we need to go from here? What are the needs? As we explore these trends and future planning we will engage in discussions around RCML's three goals:

- Developing and sustaining a professional learning community of researchers and school leaders.
- Advancing research about PK-20 mathematics learning, PK-16 teacher preparation and teacher

professional development.

• Informing practice through dissemination of scholarly works through professional fellowship, conference presentations and publications.

Speaker

Trena Wilkerson Professor | Baylor University

Saturday, March 05, 2022

Breakfast and Snacks

7:00 AM - 7:55 AM | Location: Delaney Hallway

Please come out early to enjoy breakfast and coffee before the Saturday breakout sessions.

PST Assessment Experiences Across Mathematics Education Courses

8:00 AM - 8:55 AM | Location: Homestead

Authors: Michael Warren; Melissa Eubank; Eileen Faulkenberry; Beth Riggs; Kathy Horak Smith

Mathematics teacher educators share experiences creating whole-class and individual assessment tasks spanning multiple mathematics education courses.

Speakers

Michael Warren

Instructor of Mathematics | Tarleton State University

Melissa Eubank

Mathematics Instructor and Director of Tutoring and Learning Center | Tarleton State University

Professor | Tarleton State University

Kathy Horak Smith

Eileen Faulkenberry

Professor and Department Head of Mathematics | Tarleton State University

Developing Mathematical Knowledge for Teaching in Pre-Service Teachers

8:00 AM – 8:25 AM | Location: Cross Timbers I

Authors: Jason Proctor; Tonya Garrett

This session presents the results of how elementary teacher candidates, Åô MKT developed after creating and implementing a revised curriculum for a Numbers & Operations course.

Speakers

Northeastern State University

Tonya Garrett

Jason Proctor

Assistant Professor | Northeastern State University

An exploratory study of factors influencing mathematics problem solving.

8:00 AM - 8:25 AM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

In this quantitative study we investigated the factors influencing students problem solving proficiency.

Sam Rhodes

Assistant Professor | Georgia Southern University

Antonio Gutierrez de Blume

Associate Professor of Research | Georgia Southern University

Allison DePiro Senior Implementation Specialist | CueThink

Measuring Students' STEM Smart Skills - Studying Teachers' Beliefs

8:00 AM - 8:25 AM | Location: Haak

Authors: Alan Zollman; Emily Suh; Blanca Estevez Posadas

This systematic review of the literature reports on teacher beliefs about the life skills and practices students need to be successful STEM learners.

Speaker

Alan Zollman

Professor | Indiana University Southeast

Preservice Teachers' Lessons: A Study of Mathematics Knowledge for Teaching

8:30 AM - 8:55 AM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

Authors: Seanyelle Yagi; Linda Venenciano; Winnie Wong

This qualitative study presents an analysis of two preservice teachers, lesson designs and reflections to assess their mathematical knowledge for teaching.

Speakers

Seanyelle Yagi

Assistant Specialist | University of Hawaii at Manoa

Linda Venenciano

Associate Professor | University of Hawaii, Manoa

Winnie Wong

University of Hawaii at Manoa

Student Voices and Reflections on Mathematics Teacher Preparation Programs

8:30 AM - 8:55 AM | Location: Virtual

Authors: Hope Marchionda; Nick Fortune; Natasha Gerstenschlager

We will share and discuss findings from preservice and inservice mathematics teachers on their beliefs about the strengths and weakness of their preparation programs.

Speakers

Hope Marchionda

Nicholas Fortune

Associate Professor | Western Kentucky University

Western Kentucky University

Natasha Gerstenschlager

Western Kentucky University

Fraction Division: Preservice Teachers Domain and Representation Knowledge

9:00 AM - 9:55 AM | Location: Homestead

Authors: Kwaku Adu-Gyamfi

We share a study that demonstrates that Preservice teachers, ability to attend to student solutions, interpret student strategies, and respond to student thinking may be limited and compartmentalized to particular representations and conceptualizations of fraction division.

Speaker

East Carolina University

Kwaku Adu

Don't Deface, Reroute: Road to Success

9:00 AM - 9:55 AM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

Authors: Sara Thurmond; Barba Patton; Angela Winn; Andy Tomek

Student evaluations, which take time, are the collecting of grades or gathering of information to promote future successful learning. Strategies will be shared for both.

Speakers

Angela Winn

Math tutor and supplement instructor | University of Houston-Victoria

Andy Tomek

University of Houston-Victoria

Building High School Students' Spatial Sense through Short, Daily Tasks

9:00 AM - 9:55 AM | Location: Haak

Authors: Telithia Russ; Jennifer Cribbs; Adrienne Sanogo

In this presentation, we will examine potential changes in high school students' spatial sense abilities based on a targeted intervention.

Speakers

Telithia Russ

Graduate Student | Oklahoma State University

Jennifer Cribbs

Associate Professor | Oklahoma State University

Adrienne Sanogo

Associate Dean For Academic Programs and Student Services | Oklahoma State University

Building Community in the STEM Fields

9:00 AM - 9:25 AM | Location: Virtual

Authors: Edel Reilly

Reports on a project in a mathematics department to build community through monthly meetings, activities, and workshops in a STEM field.

Speaker

Edel Reilly

Interim Dean College of Education and Communications | Indiana University of Pennsylvania

Enhancing Culturally Relevant Math Tasks with Multicultural Literature

9:00 AM - 9:25 AM | Location: Becker II

Authors: Dittika Gupta; Alesia Moldavan; Angela Bullard; Molly Melloan

This study examines how preservice teachers used multicultural literature to design and implement culturally relevant math tasks in methods courses.

Dittika Gupta

Associate Professor | Midwestern State University

Alesia Moldavan

Assistant Professor | Georgia Southern University

Investigations in Mathematics Learning (IML) Editor Chat 2

9:00 AM - 9:55 AM | Location: Pheasant Ridge

Come chat with an editor for RCML's flagship journal: Investigations in Mathematics Learning (IML)! Bring ideas and questions for your 1-1 meeting! No advance notice is needed.

Speaker

Jonathan Bostic

Professor of Mathematics Education | Bowling Green State University

Building Community through Mathematics Education Leadership Collaborative

9:30 AM - 9:55 AM | Location: Becker I

Authors: Sandi Cooper; Trena Wilkerson; Arash Abnoussi; Dorina Mittrea

In this session, a team will share the experiences of forming and maintaining an effective partnership of mathematics educators through strategic plans for collaboration.

Speakers

Sandi Cooper

Professor and Associate Dean of Undergraduate Education | Baylor University

Trena Wilkerson Professor | Baylor University

Tolobool | Daylor Onivo

Dorina Mittrea Baylor University

Corequisite over of remediation: A reflection three years later

10:00 AM - 10:25 AM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

Authors: Lorraine Gale; Cora Neal

Learn about the impacts, strengths, and challenges of a corequisite quantitative reasoning course at a four-year, open-enrollment institution.

Speakers

Weber State University

Cora Neal

Lorraine Gale

Weber State University

Reaching for College Readiness - Preparing, not Repairing

10:00 AM - 10:25 AM | Location: Cross Timbers I

Authors: William Speer

Speaker

William Speer

Director, Math Learning Center | University of Nevada Las Vegas

Shaping the future: Specifying an Optimized Sequence of Shapes

10:00 AM - 10:25 AM | Location: Becker II

Authors: Julie Nurnberger-Haag; Clarissa Thompson

We propose a better specified and theorized sequence to promote geometric shape learning by applying insights from multiple disciplines.

Speaker

Julie Nurnberger-Haag

Assistant Professor | Kent State University

Talk Moves for Mentoring Model Construction in Mathematical Biology

10:30 AM - 11:00 AM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

We discuss the role of faculty mentors in guiding four groups of undergraduates to developing a mathematical biology research question and accompanying model.

Speaker

Carlos Castillo-Garsow

Associate Professor | Eastern Washington University

Virtual reality simulations and preservice teachers' diagnostic competence

10:30 AM - 10:55 AM | Location: Virtual Presentation (In-Person Attendees: Pheasant Ridge)

Authors: Enrique Ortiz

The purpose of the study was to help preservice teachers (PSTs) transition into the elementary education classroom with appropriate questioning skills.

Speaker

Enrique Ortiz

Professor | University of Central Florida

Using HSGPA as Placement Tool for College Math Coursework

10:30 AM - 11:00 AM | Location: Cross Timbers I

Authors: Stacey Denum Michie; Joshua Baker

This study examines using HSGPA as a placement tool at a community college to address placement equity gaps in college level mathematics.

Speaker

Stacey Denum Michie Oklahima State University

Understanding Mastery-Oriented Mathematics Teachers' Resilience

10:30 AM - 11:00 AM | Location: Haak

This study will explore middle grades mathematics teachers (MGMT) who maintain their mastery orientation while teaching in performance-based environments.

Speaker

Tonya Rhodes

Graduate Teaching Assistant/PhD candidate | Oklahoma State University

PSTs and Vignettes: Identifying Critical Issues in Mathematics Education

10:30 AM - 10:55 AM | Location: Becker I

Authors: Ryann N. Shelton; Keith Kerschen; Trena Wilkerson; Melissa Donham

This session will address how vignettes can be used with preservice teachers to support their identification of critical issues related to mathematics teaching and learning.

Speakers

Baylor University Keith Kerschen

Concordia University Nebraska

Professor | Baylor University

Melissa Donham

Baylor University

Boxed Lunch

11:00 AM - 11:55 AM | Location: Delaney Hallway

Before you leave please stop and grab your boxed lunch to go! Thanks again for another engaging and informational RCML conference.
